

NIMIREAUX

UGANDA LIMITED

COMMERCIAL MILLING & COMMODITY TRADE ARCHITECTURE

Official Comprehensive Corporate Dossier & Technical Specification Standard. Providing certified Grade 1 fortified flours, grain reserves, and transnational commodity supply across the East African Community.

DOCUMENT REF	COMPLIANCE SCOPE	ASSAY BENCHMARK
NIM-DOS-2026/V4	UNBS / EAS 768 / ISO	< 5.0 ppb Aflatoxin

✓ UNBS Quality Mark (US 2:2017) ✓ Triple Fortified (Vitamin A, Zinc, Iron) ✓ East Africa Transit Certified

HEADQUARTERS: PLOT 42/48 INDUSTRIAL AREA, KAMPALA, UGANDA • MILLING COMPLEX: JINJA INDUSTRIAL CORRIDOR

AGRO-INDUSTRIAL EXCELLENCE

Corporate Overview & Strategic Basins

Nimireaux Uganda Limited operates as an integrated agro-industrial milling powerhouse, engineering food security and premium grain products engineered to the most stringent international humanitarian and commercial specifications.

450 MT	12,500+	35,000 MT	5 Countries
DAILY GRAIN INTAKE	CONTRACTED FARMERS	AERATED SILO STORAGE	CROSS-BORDER REACH

Corporate Mission & Vision

Mission: To transform East Africa's agricultural wealth into uncompromised human nutrition through precision milling, bio-fortification, and zero-loss commodity logistics.

Brand Mantra: *"Pure Nutrition. Powering Possibilities."* Rooted in the belief that regional economic vitality begins with pure, bio-available nourishment for schools, workforces, and families.

Sourcing Architecture

Our proprietary outgrower aggregation network spans Uganda's prime agricultural belts:

- **Bunyoro & Masindi Basin:** Premium non-GMO white dent maize with exceptionally high starch density.
- **Acholi & Lango Corridors:** Drought-resilient finger millet, sorghum, and protein-dense soybean reserves.
- **Rwenzori & Elgon Foothills:** High-altitude hard wheat and specialty grain clusters.

Ethical Agronomy & Sustainability Footprint

Guaranteed Fair Farm-Gate Pricing:
Pre-planting contracts and digital payments safeguard rural farming livelihoods against speculative commodity swings.

Solar-Assisted Silo Aeration:
Clean energy-powered drying silos maintain constant relative humidity (≤ 13%) before grain enters milling lines.

Zero-Waste Circular Mill:
100% of mill by-products (hominy feed, germ cake, coarse bran) are valorized into certified high-yield animal feeds.

ENGINEERING PURITY

Industrial Milling Flow & Technology

Our Jinja and Kampala milling facilities employ automated Swiss-engineered roller mills and multi-tier optical sorters to achieve surgical purity, zero grain stress, and optimal starch bioavailability.

The 5-Stage Precision Milling Flowsheet

STAGE 01	**Pre-Cleaning & Destoning:** High-efficiency vibratory screens, magnetic separators, and specific gravity destoners eliminate 99.9% of dust, chaff, metallic debris, and stones.
STAGE 02	**Sortex Bichromatic Optical Sorting:** High-resolution CCD sensors and infrared cameras inspect each grain individually, rejecting discolored kernels, fungal ergot, and aflatoxin suspects.
STAGE 03	**Hydrothermal Conditioning & Tempering:** Grains rest in automated conditioning silos for 12 to 18 hours, tempering pericarp elasticity for complete bran and germ peel without fracturing the starchy endosperm.
STAGE 04	**Cold-Roll Reduction & Plansifter Classification:** Chilled corrugated cast rolls reduce the endosperm at low thermal impact, followed by 24-deck gyroscopic sifters grading flour to 120-micron finesse.
STAGE 05	**Synchronized Micro-Dosing Fortification:** Loss-in-weight gravimetric feeders inject micro-nutrient premix (Vitamin A palmitate, electrolytic iron, zinc oxide, niacin, folic acid) conforming to EAS 768.

Sanitation & Pest Exclusion

Entire mill floor maintains positive air pressure filtration to prevent airborne contaminant ingress. Automated insect entoleters apply mechanical impact disruption, destroying insect ova without chemical fumigation residue.

Automated Packaging Lines

Rotary bagging carousels equipped with inline metal detectors and automated checkweighers package flours into UV-stabilized, woven polypropylene sacks with inner poly liners (5kg, 10kg, 25kg, 50kg, and 1MT totes).

LABORATORY VERIFIED STANDARDS

Product Reserve Technical Specifications

Physical, chemical, and nutritional parameters for Nimireaux's six core commercial product lines, compliant with UNBS, East African Standards (EAS), and Codex Alimentarius.

PRODUCT NAME	STANDARD REF	MOISTURE	PROTEIN	AFLATOXIN TOTAL	GRANULOMETRY	FORTIFICATION
Grade 1 Royal Super White Maize Flour	US 2 / EAS 44	≤ 13.0%	≥ 8.5%	**< 5.0 ppb**	98% < 212 µm	Vit A (1.5mg/kg), Iron, Zinc
Fortified Multi-Grain Porridge Blend	EAS 768 / US 738	≤ 12.0%	≥ 12.8%	**< 4.0 ppb**	95% < 250 µm	Vit A, B-Complex, Calcium, Iron
Golden Yellow Maize Flour	US 2:2017	≤ 13.0%	≥ 9.0%	**< 5.0 ppb**	96% < 212 µm	Natural Carotenoids + Vit A/Zinc
Baker's High-Gluten Hard Wheat Atta	US EAS 51	≤ 13.5%	≥ 11.5%	**< 4.0 ppb**	90% < 180 µm	Iron, Folic Acid, Zinc Oxide
Brewer's Refined Corn Grits	Industrial Spec	≤ 12.5%	≥ 7.5%	**< 3.0 ppb**	Mesh 14–28 uniform	Unfortified (Industrial Brewing)
Prime Livestock Bran & Germ Cake	US 973:2019	≤ 12.0%	≥ 14.5%	**< 10.0 ppb**	Coarse Flake	High Dietary Fiber (12%)

Nutritional & Sensory Profiling

Appearance & Color:
L* > 92.5 (Brilliant white for Super Posho); Natural amber-gold for Golden Maize. Free from dark specks or charred hulls.

Odor & Palatability:
Fresh, sweet cereal aroma. Absolutely devoid of sour, rancid, musty, or chemical solvent odors.

Digestibility & Cooking Time:
Even gelatinization temperature (68–72°C), yielding smooth, lump-free ugali/posho with extended keeping qualities.

Packaging, Shelf Life & Palletization

Primary Packaging:
Food-grade virgin BOPP printed pouches (5kg, 10kg) and heavy-gauge woven PP bags with heat-sealed PE liners (25kg, 50kg).

Shelf Life Guarantee:
9 Months under cool, dry storage (≤ 24°C, ≤ 65% RH) on raised treated wooden or plastic pallets.

Pallet Configurations:
Standard Euro-pallets (1200×800mm) wrapped in 5-layer stretch film with corner protectors (1.0 to 1.5 MT per pallet).

COMPLIANCE & TOXICOLOGY

Quality Assurance & Analytical Testing

Every production run at Nimireaux is subjected to continuous laboratory surveillance. Our in-house analytical laboratory operates in tandem with accredited third-party validation to guarantee complete consumer safety.

HPLC Aflatoxin Surveillance

Our facility utilizes high-performance liquid chromatography (HPLC) with photochemical post-column derivatization:

- **Aflatoxin B1:** Guaranteed < 2.0 ppb (Uganda Limit: 5.0 ppb).
- **Total Aflatoxins (B1+B2+G1+G2):** Guaranteed < 5.0 ppb (EAC Regional Limit: 10.0 ppb).
- **Ochratoxin A & Fumonisin:** Monitored under Codex stan 193 guidelines.

Microbiological Criteria

Testing performed in class-10,000 clean room incubation:

- **Escherichia coli:** Absent in 1.0 g
- **Salmonella spp.:** Absent in 25.0 g
- **Yeast & Molds:** < 100 CFU / g
- **Total Viable Count (TVC):** < 10,000 CFU / g

Laboratory Instrumentation Inventory

Spectrophotometry & HPLC:
Quantitative fluorometric microplate readers and HPLC for sub-ppb mycotoxin assays.

NIR Protein & Moisture:
Foss Infratec grain analyzers providing real-time moisture, protein, and starch readings in 60 seconds.

Ro-Tap Sieve Shaker:
Mechanical granulometry testing across brass mesh series (120, 180, 212 µm) for texture validation.

Cryptographic Traceability & Batch Verification

Every institutional consignment is issued an individual Certificate of Analysis (CoA) tied to a cryptographically signed QR code printed directly on each sack. Scanning the code verifies:

✓ Origin silo & farm cluster
✓ HPLC aflatoxin quantification
✓ Mineral premix dosing telemetry

SUPPLY CHAIN & COMMERCIAL TERMS

Regional Logistics Corridors & Directory

Nimireaux maintains dedicated cross-border logistics partnerships serving commercial distributors, UN agencies, NGOs, regional institutional food reserves, and industrial food manufacturers.

Transit Corridors & Lead Times

- **Kampala / Jinja (Domestic):** 24 to 48 Hours. Fleet of 30 MT flatbeds and box trucks.
- **Kenya Corridor (Busia / Malaba):** 48 to 72 Hours. Streamlined COMESA single customs declaration.
- **South Sudan Corridor (Nimule – Juba):** 4 to 6 Days. Escorted overland transit with satellite GPS.
- **Rwanda / DR Congo (Katuna / Mpondwe):** 3 to 5 Days. Dedicated transshipment hubs.

Commercial Trade Terms

- **Incoterms 2020:** EXW (Milling Plant), FCA Kampala, CPT Juba/Kigali, CIF Mombasa.
- **Minimum Order Quantity (MOQ):** 10 MT (Spot Commercial); 30 MT (Export Containerized).
- **Settlement Modalities:** Irrevocable Confirmed Letter of Credit (LC at Sight), TT Wire Transfer, Escrow.
